

How to Fit

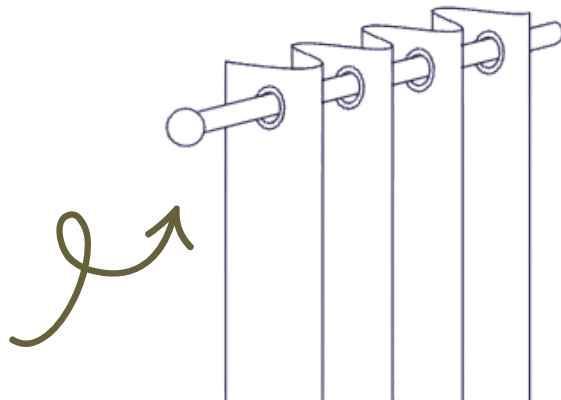

Eyelet Curtains

Step 1 -

Simply thread the eyelets onto your curtain pole, no hooks or complicated tape systems required.

Step 2 -

The metal rings will glide smoothly onto your curtain pole, making them incredibly easy to open and close.

Curtain care instructions

All made-to-measure curtains should be professionally dry cleaned to maintain their quality and finish. Each curtain includes a care label sewn into the side hem for reference. To keep them looking fresh between cleans, use the upholstery brush attachment on a vacuum cleaner to gently remove dust and maintain brightness.

For the best drape and a professional finish, we recommend dressing your curtains after installation using information below:

If you have access to a steamer, lightly steam out any creases from top to bottom, taking care not to over-steam or let the fabric become damp. Alternatively, an iron on a gentle steam setting can achieve the same effect. Pull the curtains into position, ensuring the spaces between pleats are even, and smooth each pleat gently by hand so the fabric falls naturally. Make sure to not touch the face fabric directly.

Once the pleats are shaped, secure the curtains in place using fabric strips or tiebacks. Leave the curtains tied for at least 48 hours to help the pleats set beautifully. This simple step ensures your curtains hang perfectly and retain their elegant drape over time.
